HyperX Fan

Keeps memory cool while looking cool.

Designed with PC enthusiasts and gamers in mind, the HyperX® Fan features two 60mm fans that optimise airflow around modules to help memory run at peak performance for longer periods of time.

HyperX Fan is made of anodised aluminium and is available in black or the same familiar blue as HyperX heat spreaders. When it's turned on, its fan blades are illuminated by eight small LEDs.

HyperX Fan is available as a standalone product or bundled with HyperX Beast's 64GB 2133MHz quad-channel memory kit. It's backed by a one-year warranty and legendary Kingston® reliability.

HyperX Fan

FEATURES/BENEFITS

> **Twin fans focus air directly onto HyperX modules**
> **Quiet**
> **Runs cooler**
> **One-year warranty**

SPECIFICATIONS

> **Colours** blue and black
> **Dimensions** 5.68" x 2.75" x 2.16"
> **Rated voltage** 12 VDC
> **Operational voltage** 8-13.5 VDC
> **Input power** 1.08 watt
> **Operational voltage** 8-13.5VDC
> **RPM** 3000±10%
> **Acoustical noise** 25(28 max.) dB-A
