

Kingston has the right encrypted USB 3.0 Flash drive to meet your security needs.

Your company is at risk whenever employees use their own Flash drives to travel with data and take work home. Protect sensitive data by standardizing on an encrypted Kingston® DataTraveler® USB 3.0 or IronKey™ Flash drive. With several models and capacities to choose from, there's one that's ideal for your company's needs, whether you're looking for basic security or have to comply with data-at-rest directives.

All DataTraveler drives are covered by a five-year warranty (DataTraveler 2000 has a three-year warranty), free technical support and legendary Kingston reliability. All drives below are 100% encrypted to meet even the strictest security policies. For more information, go to kingston.com/encryptedsecurity

Kingston® DataTraveler® 2000 uses DataLock® Technology licensed from CleVx, LLC.

¹ Federal Information Processing Standards (FIPS) 140-2: "Security Requirements for Cryptographic Modules." For more information, visit <http://csrc.nist.gov/publications/PubsFIPS.html>

² Minimum order of 50 pcs needed for Customization; for more information on customization options, visit kingston.com/usb/encrypted_security

³ Some of the listed capacity on a Flash storage device is used for formatting and other functions and thus is not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products. For more information, go to Kingston's Flash Memory Guide at kingston.com/flashguide.

⁴ Speed may vary due to host hardware software and usage.

⁵ Certain distributions of Linux will require super-user (root) privileges in order to execute the DTVP commands properly in the terminal application window.
