

Kingston DataTraveler Locker

kingston.com

PRODUCT DISCONTINUED – FOR INFORMATION ONLY

Put a lock on your personal data.

With identity theft on the rise, personal security should be a number-one priority. Kingston's DataTraveler® Locker family provides personal security for your files when you're on the go. Its hardware encryption safeguards even the most sensitive data in case the drive is lost or stolen. Your password becomes the only key to access the data that you care about.

Kingston's DataTraveler Locker USB Flash drive has user-defined personal security. The public zone can be used like any other standard USB Flash Drive for everyday documents, music, photos and more. When defined and set up by the user, the private zone can protect more sensitive data such as tax returns, work documents and other confidential data. DataTraveler Locker's easy-to-use setup process allows you to determine what portion of the drive you want to keep public and what portion you want to be private. Create your own password on the private portion to protect against unauthorized access.

DataTraveler Locker features a swivel design for ease of use with capacities up to 16GB and is also a great promotional item for businesses; your company logo can appear on it to increase your brand recognition†.

DataTraveler Locker is backed by a five-year warranty, 24/7 tech support and legendary Kingston® reliability.

Compatibility Table

Operating System	File Transfer	Personal Security/ Password Protection
Windows® 7**	Yes	Yes
Windows Vista® ** (SP1,SP2)	Yes	Yes
