Media Reader

An essential for your digital media.

Nothing goes better with digital media than an external reader for your desktop or notebook at home or on the road. Kingston's Media Reader opens a direct gateway between your digital media and a USB port by simply using expandable storage cards to move photos, music, data and more between devices and eliminating the need to carry cables to connect multiple devices.

Designed to support popular types of Flash memory cards without the use of adapters or a power cable, Kingston's hi-speed Media Reader is incredibly versatile, whether used for personal or business use. While on the go, its unique sliding chassis hosts a compact USB cable for use with a notebook or other portable devices' USB port. In the office or at home, just plug and play the reader into the USB port using the ample three-foot USB cable to conveniently connect to your desktop or tower computer.

The media card formats supported include: CompactFlash® Type I and II, SD™, SDHC™, SDXC™, miniSD™, miniSDHC™, microSD™, microSDHC™, microSDXC™, MMC, MMC*mobile*™ (DV RS-MMC), MMC*plus*™, MMC*micro*™, RS-MMC, Microdrive, Memory Stick™ Micro (M2), Memory Stick, Memory Stick PRO, Memory Stick Duo and Memory Stick PRO Duo.

Kingston's Media Reader is the ideal companion for the cards you already own or combine it with a purchase from Kingston's range of Flash card solutions. Each Media Reader comes with a two-year warranty, plus legendary reliability that makes Kingston® the leader in memory.
