

DataTraveler 4000G2 with Management

kingston.com/encryptedsecurity

Protect sensitive data with 256-bit AES encryption.

Kingston's DataTraveler® 4000G2 with Management USB Flash drive offers affordable business-grade security with 256-bit AES hardware-based encryption in XTS mode, to safeguard 100 per cent of confidential data. It provides companies with the most commonly required security for USBs. For added peace of mind, the drive enforces complex password protection and locks down and reformats after 10 intrusion attempts, and it functions in read-only access mode (enabled via SafeConsole) to avoid potential malware risks.

DT4000G2DM features SafeConsole¹ management (purchased separately) that enables a complete set of management tools when used with the server-based, control centre technology of SafeConsole. IT administrators can centrally manage secure USB drives to meet compliance requirements and provide a higher level of support. Activation is a simple process and allows IT professionals to set passwords remotely, configure password and device policies, activate audit for compliance and more. These powerful tools simplify drive integration, operation and management, even in remote locations.

DataTraveler 4000G2DM is FIPS 140-2 Level 3 certified and TAA-compliant, to meet frequently requested corporate and government IT requirements. Organisations can customise drives to meet internal corporate IT requirements. Co-logo, serial numbering, number of attempted password entries, minimum password length and customised product identifiers for integration into standard end-point management software (white-listing) are all available through customisation.

USB 3.0 technology means that users don't have to compromise on transfer speeds for security and can safely and easily store and access data with SuperSpeed technology.

Features/specs on reverse >>

- > Affordable, business-grade security
- > Features SafeConsole¹ management
- > FIPS 140-2 Level 3 certified and TAA compliant
- > Customisable to meet specific internal corporate IT requirements
- > SuperSpeed (USB 3.0) technology

DataTraveler 4000G2 with Management

FEATURES/BENEFITS

- > **Encrypted protection** — With encryption, no one can see what you have stored on the drive without knowing the password.
- > **Manageable** — DT4000G2DM enables a complete set of centralised administration and management tools when used with the server-based, control centre technology of SafeConsole.
- > **FIPS 140-2 Level 3 Certification** — The drive is FIPS 140-2 Level 3 certified and TAA compliant, to meet frequently requested corporate and government requirements,
- > **Customisable** — Customise drives in a variety of ways, including serial numbering, co-logo and customised product identifiers for integration into standard end-point management software (white-listing), to meet internal corporate IT requirements.

SPECIFICATIONS

- > **Interface** USB 3.0
- > **Capacities²** 4GB, 8GB, 16GB, 32GB, 64GB
- > **Speed³**
 - USB 3.0:** 4GB: 80MB/s read, 12MB/s write
8GB & 16GB: 165MB/s read, 22MB/s write
32GB: 250MB/s read, 40MB/s write
64GB: 250MB/s read, 85MB/s write
 - USB 2.0:** 4GB: 30MB/s read, 12MB/s write
8GB–64GB: 30MB/s read, 20MB/s write
- > **Dimensions** 77.9mm x 22mm x 12.05mm
- > **Waterproof** Up to 4 ft.; conforms to IEC 60529 IPX8.
Product must be clean and dry before use.
- > **Operating Temperature** 0°C to 60°C
- > **Storage Temperature** -20°C to 85°C
- > **Compatibility** USB 3.0 compliant and 2.0 compatible
- > **Minimum System Requirements:**
 - USB 3.0 compliant and 2.0 compatible
 - Two (2) free drive letters required for use⁴
- > **Warranty/support** 5-year warranty, free technical support

DT4000G2DM/32GB
DT4000G2DM/64GB

1 SafeConsole Secure USB Management Server Version 5.0.1 +, purchased separately.

2 Some of the listed capacity on a Flash storage device is used for formatting and other functions and is thus not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products. For more information, go to Kingston's Flash Memory Guide at kingston.com/flashguide.

3 Speed may vary due to host hardware, software and usage.

4 First free drive letters after physical devices such as system partition, optical drives etc.

5 Certain distributions of Linux will require super-user (root) privileges to execute the DataTraveler commands properly in the terminal application window.
