 WI-DRIVE

Store and share your favourite content with your favourite people.

With integrated Wi-Fi and four hours of battery life, Kingston's new Wi-Drive® offers pocket-sized portable storage and easy file sharing for mobile devices, including iPad, iPhone and Android™ devices. Accessing or sharing your personal media has never been easier. With Wi-Drive, you can add 32GB–64GB of space accessed wirelessly from your mobile device. The content can be shared by three people so you are no longer limited to the space available on your portable device.

Whether at home, on the road or in a meeting, Wi-Drive lets you take more content with you without running out of storage space. Just load your files before you go and wirelessly access them from Wi-Drive when you need them.

Kingston's Wi-Drive offers great:

- Portability: Wi-Fi enabled and Flash-based storage provides protection against accidental data loss from drops, bumps and knocks so you can take your favourite media with you. Just use your digital device as a player and display.
- Expanded storage: Wi-Drive adds up to 64GB of storage space for more of your favourite music, photos, videos, PDFs and more. It's also a great companion for Windows users on iPads, as it removes the frustration of using auto sync to view content.
- Casual sharing: Wi-Drive lets you share your favourite media with three users simultaneously — without any hassle.
- Multi-platform wireless streaming so you can use any combination of mobile devices whether iOS or Android-based.

Access to the drive is over the 802.11g/n protocol, just like your typical home wireless hub. Carry extra files and content with you and use your mobile device as a display to share information.

Best of all, Wi-Drive is backed by legendary Kingston® reliability and a one-year warranty.

- > Works with iPad, iPhone and Android devices
- > Share your data with 3 users simultaneously

1 Please note: Some of the listed capacity on a Flash storage device is used for formatting and other functions and is thus not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products. For more information, go to Kingston's Flash Memory Guide at kingston.com/FlashGuide.

2 Requires the Wi-Drive app.

3 View the Wi-Drive App description for the most up-to-date features.

4 Wi-Drive is formatted in FAT32 so the file size limit is 4GB.

5 Please check the user guide of your mobile device for a full list of supported files.

6 For Android and Kindle Fire, video support is limited to 2GB.
